STATISTICAL OFFICE,  
CUSTOM HOUSE,  
BANGKOK,

MAY 7th 1908.

Your Highness,

I have the honour to submit a Statement of the Foreign Trade and Navigation of the Port of Bangkok for the Siamese year 126 (April 1st, 1907 to March 31st, 1908). Previous statements of this nature, presented annually since 1899, have covered periods corresponding to the Christian year (January 1st. to December 31st), and the change of period to that of the Siamese year (April 1st. to March 31st), left a hiatus of three months—January to March 1907. To meet this difficulty the detailed figures for the two Siamese years, 125 (April 1906 to March 1907) and 126 (April 1907 to March 1908) have been printed side by side; so that comparison between the figures for the year 125 (April 1906 to March 1907) and the figures already published for the Christian year 1906, may at once reveal any increase or decrease in the three months January to March 1907, as compared with the three months January to March 1906.

In preparing the Comparative Tables it has been found possible to tabulate all the figures in Siamese years, with the exception of those of tables V and VI—Total Value of Imports and Exports from and to each Country; so that the Comparative Tables already published, shewing the figures of Christian years, have been practically superseded.

I have the honour to be

Your Highness' obedient servant,

NORMAN MAXWELL.

Mom Chow Prom,

Director-General of Customs.

## MEMORANDUM.

---

In the case of Imports the Values are intended to represent the cost, plus insurance and freight to the place of landing. The values are exclusive of the amount of duty. In the case of Exports the values are intended to represent the cost of the goods, including all charges thereon up to the time of their delivery on board ship : they thus include the duty.

The quantities and value of both Imports and Exports have been given whenever possible. But in the case of Imports liable to an ad valorem duty the greatest difficulty has been experienced in obtaining quantities ; even those given must be accepted with caution. More reliance may be placed on the values, which are subject to check at the hands of the Department's Officers. In the case of Exports, on the other hand, where the duty is leviable on quantities, the difficulty has been in obtaining proper values. Deductions can in such cases be more accurately drawn from a comparison of quantities. This is particularly so in the case of Rice. In the case of Teak the Department depends, both for quantities and values, on information supplied by the merchants concerned. The figures must be treated as approximations only.

Imports have been credited to their original countries of consignment whenever possible, but large quantities of goods have, of necessity, been credited to Singapore and Hong Kong for want of further information. In the same way many goods are shewn as exported to Singapore and Hong Kong which are obviously intended for transshipment, but the ultimate destination of which cannot be ascertained. There are also certain consignments of both Teak and Rice of which nothing further is known than that they are shipped to Europe, or the Azores "For Orders."

\* The total quantity ( in Piculs ) of all Rice including Paddy has been inserted in each case, as affording a juster indication of the course of Trade.

Considerable difficulty is experienced, in obtaining the values of Rice exported, and the figures given should be treated as approximate only.

§ In the summary issued for the year 125, the Total Value of Rice exported was given in error as Ticals 81,909,650.

† The average annual value of the Tical was as follows:—

## MEMORANDUM.

---

In the case of Imports the values given represent the values of commodities, landed in Bangkok. They do not include the amount of duty. In the case of Exports the values represent the cost of the goods, including all charges thereon up to the time of their delivery on board ship: they thus include the duty.

The quantities and value of both Imports and Exports have been given whenever possible. But in the case of Imports liable to an ad valorem duty the greatest difficulty has been experienced in obtaining quantities; even those given must be accepted with caution. More reliance may be placed on the values, which are subject to check at the hands of the Department's Officers. In the case of Exports, on the other hand, where the duty is leviable on quantities, the difficulty has been in obtaining proper values. Deductions can in such cases be more accurately drawn from a comparison of quantities. This is particularly so in the case of Rice. In the case of Teak the Department depends, both for quantities and values, on information supplied by the merchants concerned. The figures must be treated as approximations only.

Imports have been credited to their original countries of consignment whenever possible, but large quantities of goods have, of necessity, been credited to Singapore and Hong Kong for want of further information. In the same way many goods are shewn as exported to Singapore and Hong Kong which are obviously intended for transshipment, but the ultimate destination of which cannot be ascertained. There are also certain consignments of both Teak and Rice of which nothing further is known than that they are shipped to Europe, or the Azores, "For Orders."

Up to and including the year 1906 yearly returns prepared by this Office covered periods corresponding to the Christian years. The difficulties resulting from the change of period, to that of the Siamese year, have, in the case of all other comparative tables, been overcome. The labour of recompiling this table was thought, however, to be incommensurate with its value: and the figures for the Christian years prior to 1907 have therefore been retained,—a comparison between differing periods being, for the present, unavoidable.

Up to and including the year 1906 yearly returns prepared by this Office covered periods corresponding to the Christian years. The difficulties resulting from the change of period, to that of the Siamese year, have, in the case of all other comparative tables, been overcome. The labour of recompiling this table was thought, however, to be incommensurate with its value: and the figures for the Christian years prior to 1907 have therefore been retained,—a comparison between differing periods being, for the present, unavoidable.

## MEMORANDUM.

---

In the case of Imports the values given represent the values of commodities, landed in Bangkok. They do not include the amount of duty. In the case of Exports the values represent the cost of the goods, including all charges thereon up to the time of their delivery on board ship: they thus include the duty.

The quantities and values of both Imports and Exports have been given whenever possible. But in the case of Imports liable to an ad valorem duty the greatest difficulty has been experienced in obtaining quantities; even those given must be accepted with caution. More reliance may be placed on the values, which are subject to check at the hands of the Department's Officers. In the case of Exports, on the other hand, where the duty is leviable on quantities, the difficulty has been in obtaining proper values. Deductions can in such cases be more accurately drawn from a comparison of quantities. This is particularly so in the case of Rice.

In the memoranda attached to previous reports, reference has been made to the possible unreliability of the figures representing the value of Teak exported. A new system of collecting these figures comes into force from April 1st, 1910, by means of which it is hoped to secure, if not absolute accuracy, at least a close and trustworthy approximation. Next year an attempt will be made to examine previous figures in the light of this more accurate information. In the meanwhile the Department has felt justified in attempting a revised estimate of the value of teak exported during last year. The values now given are calculated on the basis of information obtained as the result of a recent enquiry, and the official figures, as collected under the old system, have been entirely rejected. The most noteworthy change is in the figures representing the value of Teak exported to India, where the reduction is large enough to affect materially not only the total of teak exports, but the total of all exports to India, and even the balance as between the grand total of Imports and Exports. In making comparisons of all these figures, a generous allowance must be made on the supposition of over declaration in previous years.

Imports have been credited to their original countries of consignment whenever possible, but large quantities of goods have, of necessity, been credited to Singapore and Hongkong for want of further information. In the same way many goods are shown as exported to Singapore and Hongkong which are obviously intended for transshipment, but the ultimate destination of which cannot be ascertained. There are also certain consignments of goods, particularly of rice, of which nothing further is known than that they are shipped to Europe.
